Warnings and Precautions

Suicidal Ideation and Behavior: In clinical trials, suicides, suicide attempts and suicidal ideation have been reported. Postmarketing cases of suicidal ideation and behavior as well as self-injurious ideation and new onset or worsening of depression have been reported within the first few weeks of starting Motegrity. A causal association between treatment with Motegrity and an increased risk of suicidal ideation and behavior has not been established. Monitor patients for new onset or worsening of depression and emergence of suicidal thoughts and behavior. Instruct patients to discontinue Motegrity immediately and contact their healthcare provider if they experience any of these symptoms.
